Editorial Reviews

The foundations of scientific materialism are in the process of crumbling. Philosopher of science Stephen C. Meyer show how the digital code in DNA points powerfully to a designing intelligence behind the origin of life. Unlike previous arguments for intelligent design, DNA By Design presents a radical and comprehensive new case, revealing evidence not merely of individual features of biological complexity but rather of a fundamental constituent of the universe: information. That evidence has been mounting exponentially in recent years, known to scientists in specialized fields but largely hidden from public view. A Cambridge University-trained theorist and researcher, director of the Discovery Institute's Center for Science and Culture, Dr. Meyer is the first to bring the relevant data together into a powerful demonstration of the intelligence that stands outside nature and directs the path life has taken.

EXTREMELY powerful information!

By Steve J. Williams on November 28, 2013

Format: DVD **Verified Purchase**

EXTREMELY powerful information! Some don't realize that there is a layer of evidence entirely over-and-above that for Irreducible Complexity which testifies on behalf of an Intelligent Designer. Specified Complexity is just as mind-blowing, and its improbability is even more precisely calculable. Once I found out that there are literally hundreds of quadrillions of computers within the cells in our bodies communicating with one another (some using triple layers of encryption!), the question that came to my mind was "Why in the @\$ is Darwinism still being taught?!"

Very good resource, lots of info covered, well presented.

By Speech60 on December 3, 2014

Format: DVD **Verified Purchase**

Stephen Meyer does a very good job presenting the material in a lecture-type presentation. Covers a lot of information with interviews at the end and a Q&A session. He explains the complexity of the cell, DNA, the information required for the cell to function and reproduce - you may want to take notes and watch this several times.

Intelligent design is the new front-line for creation vs evolution ...

By Moira on July 6, 2015

Format: DVD **Verified Purchase**

Intelligent design is the new front-line for creation vs evolution. It uses scientific methods with observable, measurable data to prove information could not have evolved and organisms could not have randomly mutated their way to perfection with their environment.

Very good, but I wasn't really expecting a copy of Stephen lecturing to a group. I was expecting a little more of a documentary.

Excellent overview of his book, Signature in the Cell. His thesis is well presented in terms most lay people can understand. Those with an open mind will recognize the unmistakable evidence of design in the created world. I highly recommend this book.

Excellent DVD

By [Beach lover](#) on August 20, 2015

Format: DVD **Verified Purchase**

I was surprised this was in a lecture & interview format, but the material is so interesting it wasn't a disappointment at all. Dr. Meyer uses solid science to back up his beliefs. Very good, especially if you have read the book!
