Editorial Reviews

Evolution's Achilles' Heels directly demolishes the very pillars of the belief system that underpins our now-secular culture-evolutionary naturalism. It's coupled with the Biblical command to reach the lost with the Bible's Good News. In a nutshell, it's a comprehensive outreach tool like no other. Visually stunning animations and dramatic footage help to show how the theory's supposed strengths are, in fact, its fatal flaws-Evolution's Achilles' Heels. Like no other work that we are aware of, fifteen Ph.D. scientists collaborated to produce a coordinated, coherent, powerful argument. All of the contributors received their doctorates from similar secular universities as their evolutionary counterparts. Each is a specialist in a field relevant to the subject: Natural selection, origin of life, geology, genetics, radiometric dating, the fossil record, cosmology, and ethics.

#### Great Content, Compelling Arguments!

By [Tyler](#) on April 27, 2015

**Verified Purchase**

A little background about myself so you can understand the views I held prior to watching this video.

I was raised a Christian, but never gave it much thought. Assumed the Bible was correct, but never really spent any mental energy on it. As a kid, I quit attending church and was just a Christian by label, not by practice. As I went through High School, College, and my personal studies, I grew into quite the fan of science and was convinced by the arguments for evolution and against Biblical creation. I mean, they're teaching this stuff in all schools - it must be factual. Recently, I realized I've never truly considered my views of this life and this world, and started my quest for answers. I watched this video entirely open minded, but leaning towards beliefs against Biblical creation.

As someone who assumed evolution was proven fact, it was eye opening to see modern arguments and proofs showing that evolution isn't as rock-solid as my science teachers told me. The video makes a strong arguments against evolution and has revealed to me that belief in evolution is a matter of faith! In fact, I would go as far as to say that belief in evolution is absolutely nothing except faith.

The video presents arguments against evolution and for creation from a multiple disciplines and topics such as biology, origins of life, radiometric dating, cosmology, natural selection, and more. It shows that natural selection is incapable of being an engine for evolution as we are taught in school. That survival of the fittest is incapable of explaining arrival of the fittest. That life is in a state of degradation from what appears to have been more perfect origins. These scientific arguments leave you questioning how evolution has come to be known as fact. #### Quite Convincing

By [M. Degani](#) on June 12, 2015

**Verified Purchase**

As Agnostic as I am, this Production is pretty convincing in raising doubts about the "scientific" tools and methods usually used to dismiss the "sceptics" of the "Theory of Evolution".

In other words, there is no such thing as "The Theory of Evolution"; there are MANY theories of evolution, and none can answer the most-fundamental questions.

One example which hit me as a Scientist is: Carbon Dating, or any dating based on nuclear half-life measurements is flawed in its very principle because one never knows that ALL the Daughter products were indeed created from the original material assumed for a piece of rock or a fossil.

In other words, once you follow the logic presented in this DVD with an unbiased mind---if you can ignore all the propaganda you have been brain-washed with---you may start thinking and pondering for yourself.

#### Why is Evolution still taught as fact?

By [JAWS 3rd](#) on July 19, 2015

Many opponents will no doubt say this video is cherry picking, but I guarantee they will not be able to adequately counter the arguments against evolution contained in this video with any solid answers. Further, if there really is any so-called cherry picking going on at all, it only hurts the opposition's arguments more that the topics discussed here are foundational to the evolutionary argument. With these evolutionary pillars sufficiently knocked down, the theory no longer has legs to stand on, and should devolve back into the primordial soup from whence it came.

This is a very direct and professional presentation exposing the weaknesses of evolution theories. The presenters are highly qualified in their respective fields and the video is... [Read more](#) Published 1 month ago by MNThermostat

#### Good science

Like many things, ideology trumps science. Evolution is an ideology. The science is good throughout the video. Published 1 month ago by W. Chase

#### Way above Creation101

I'm already in the Creationist camp but was looking for a refresher. There's a bit too much jumping around from one PhD to another and they all speak PhD English. [Read more](#) Published 1 month ago by dsbrit

As for the video, it is sufficiently informative, and geared toward the less scientifically inclined for inclusion of a broader audience. Yet it isn't so dumbed down that it neglects any scientific standing. For deeper scientific explanations of the same issues, the book goes further to explain the same topics within the video.

**Excellent science based overview**

By [Don S](#) on June 12, 2015

**Verified Purchase**

Excellent. Packed with current information, and a broad range of topics. Adult / high school level. Younger viewers might need some guidance: touches on some sensitive subjects such as the nihilistic implications of Evolution, Darwinian influence on Hitler, and genetic entropy. Brief, explicit Christian proselytizing in the final few minutes.

**Collects and delivers multiple powerful scientific arguments for Creation**

By [Jim Pamplin of Santa Ana](#) on July 20, 2015

**Verified Purchase**

This DVD collects multiple strong scientific arguments for Creation, and powerfully delivers each one. Most people who believe in Darwinian evolution, if asked why, respond that "the evidence is overwhelming." Asked "What evidence?" they may recite one or two common claims, or answer the question with a blank stare. It isn't evidence for evolution that overwhelms - it is the IMPRESSION that evidence is overwhelming that overwhelms. This DVD goes a long, long way toward popping that mythological bubble!

**Are there any arguments left for evolution?**

By [Bill Huninghake](#) on December 3, 2014

Excellent presentation. Already have the book and ordered the DVD when it came out.

Rather than choosing to confront areas that might be regarded as soft targets, "Evolution's Achilles Heels" represents a well-argued frontal assault on what many would see as invincible strongholds for today's evolution-grounded, anti-theistic establishment thinkers.

Not sure how anyone could or would want to believe in the man made fairy tail of evolution after watching this video.

Are there any arguments left for evolution? There is really only one: 'I don't want to believe in a Creator-God, I don't want to be accountable to anyone for how I live, and evolution is the only alternative, so I am going to believe in evolution regardless of what the evidence shows and proves.'
